

# WORKFORCE PROFILE

## FAST COST-EFFECTIVE DATA & ANALYSIS

- Is the data from dozens of sources fragmented, incomplete and difficult to access quickly?
- Is your time more valuable conducting your mission critical activities and doing what you do best?

The Growth Services Group can eliminate time-consuming and repetitive research tasks by providing data driven reports for your specific community or county with an Area Labor Market or labor shed corresponding to employer's hiring experience and local commuting patterns. Market driven information (worker supply and employer demand) then becomes relevant to your particular community or county location. All reports will provide information which is integrated from dozens of official sources.

## GO FROM DATA TO INFORMATION TO WORKFORCE MARKET INTELLIGENCE

Report Provides:

- Regional Labor Market information for selected industries and occupations (i.e., other types of businesses that employ the same workers or workers with similar skill sets; other regions that employ a large number of the types of workers you need.)
- Detailed wage levels by occupation for the local and Area Labor Market.
- Where the important workforce training providers are located in your area of interest.
- Comprehensive data on population trends, industry jobs, employment trends and earnings.
- Overview of the Area Labor Market's population, employment, and earnings using state and national comparisons where appropriate to highlight unique regional characteristics.

## PRICING SUMMARY
